

METHOD AND APPARATUS FOR FILTERING DATA
CONCERNING AN ELECTRONIC PROGRAM GUIDE FOR
A TELEVISION RECEIVER

Abstract Of the Disclosure

The method of filtering data concerning an electronic program guide (EPG) in a television receiver having a device for automatically searching television channels includes supplying a list of CNI codes of all or some of the channels received by the television receiver to a memory. The method includes obtaining, from the SUMMARY of the guide, a MODIFIED SUMMARY containing only the information of the SUMMARY concerning all or some of the channels received by the television receiver, and recording only the data blocks of the CONTENTS of the guide in a memory when they correspond to all or some of the channels received by the television receiver.
